

LAMB ELECTRIC

DESCRIPTION

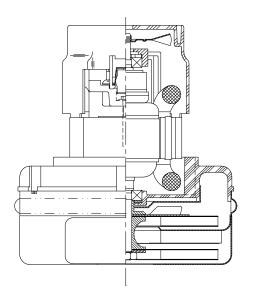

- Two stage
- 24 volts 5.7"/145 mm diameter
- Double ball bearings
- Single speed
- Peripheral bypass discharge
- Thermoset fan end bracket

POW

- Aluminum commutator bracket

DESIGN APPLICATION

- Equipment operating in environments requiring separation of working air from motor ventilating air - Designed to handle clean, dry, filtered air only

Model: 116155-00

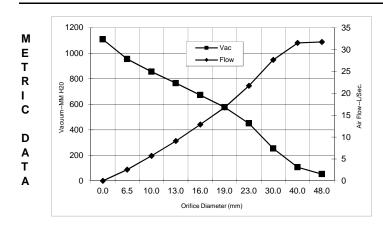

SPECIAL FEATURES

- Suitable for 24 volt D.C. operation - UL recognized, category PRGY2
- (E47185)
- Provision for grounding
- Epoxy painted fan case
- Patented air seal bearing

construction. U.S. Patent #4,088,424 - The Lamb Electric vacuum motor line offers a wide range of

performance levels to meet design needs

PRODUCT BULLETIN

IMPORTANT NOTE: Pictorial and dimensional data are subject to change without notice. Contact factory for current revision levels.

WARNING - When using AMETEK Lamb Electric bypass motors in machines that come in contact with foam, liquid (including water), or other foreign substances, the machine must be designed and constructed to prevent those substances from reaching the fan system, motor housing, and electrical components. Lamb Electric vacuum motors other than hazardous duty models should not be applied in machines that come in contact with dry chemicals or other volatile materials. Failure to observe these precautions could cause flashing (depending on volatility) or electrical shock which could result in property damage and severe bodily injury, including death in extreme cases. All applications incorporating Lamb Electric motors should be submitted to appropriate organizations or agencies for testing specifically related to the safety of your equipment.
